

Visiting Sparks Elementary

A valid Driver's License or government issued form of identification is required to visit Sparks. Guests must enter the building through our front office and, beginning August 26, 2019, must press the button by the camera near the door to be received into the building by our receptionist. Be prepared to show your Driver's License or government issued identification to the camera so that we may verify your identity.

In order to protect the learning environment of our students, guests should refrain from entering the classrooms or pod areas unless they have a pre-arranged appointment made through the teacher or front office staff.

Guests who are visiting to eat lunch with their student must sit at one of the designated guest lunch tables. All children eating at the guest tables must be with their designated parent or guest. Students may not invite other students to join them at the guest lunch tables who do not have a parent or guest with them.

The playground and recess areas are reserved only for Sparks students during the school day. After school, the playground is contracted for use only by students enrolled in the afterschool programs at Sparks. Younger siblings not enrolled at Sparks are not allowed to play on the equipment with their siblings during the school day. Parents may not be on the playground interacting with other students unless they are serving as a scheduled volunteer and have cleared a criminal background check.
