Bio & Education

After graduating from MacArthur High School in Irving, TX, I attended The University of North Texas and received my Bachelor's degree in Organizational Behavior Human Resource Management with a minor in Counseling Services. After working two years in corporate world, I began pursuing a career in education. This is my third year as a high school teacher and I love it! I enjoy mentoring and helping students pursue their dreams and strive to be the best they can be. In the future, I plan to pursue my masters in educational counseling.

Course(s) Taught

- Algebra I
- Math Models with Application
