

CERT Disaster Drill:

Over the weekend student members of USITT from FHS and LSHS participated in the CERT (Community Emergency Response Team) disaster drill with the Frisco Fire Dept. This drill helps train community members to be first responders in the case of a mass disaster i.e. tornado, earthquake, etc. This is the 8th year in participating in the bi-yearly event and this year we were asked to not only be a part of this drill (CERT) but to also have students then transported via Ambus to Centennial Medical Center and

perform their mass disaster drill as well. It was quite an honor and the kids out did themselves, as usual. They created all the wounds and acted as the victims, they stuck to their characters and received great praise from the Frisco Fire Dept., CERT members and the staff at Centennial Medical Center.

Congratulations on your service to help our community be a safer place.

BPA Students PLACE at Nationals:

The FHS Business Professionals of America participated in their National Leadership Conference last week. This year was above and beyond what we have experienced in previous years. Brock Bauer (12th) & Max Poarch (11th), placed 4th in the Nation in the BPA event Network Design Team. This is the highest FHS has ever placed in this event at the National Leadership Conference! We would also like to take a

moment to congratulate all three of our National Qualifiers, Erin Melican (10th), Brock Bauer (12th) & Max Poarch (11th). They ALL did extremely well and were extremely fierce competition in their events. We are proud of these students and their advisors Lindsey Alford, Kip Bledsoe, and Kelly Munro. Their advisors are so very thankful for the privilege of being a part of this experience in their high school careers.

Student Accepted to Summer Institute:

Heartfelt congratulations to the following Art student: Sidney Reyes! She has been accepted into this year's Nasher Summer Institute for Teens! Only 30 students are selected for the Institute at the Nasher Sculpture Center. This program exposes students to many aspects of museums and the art world. The week long Summer Institute will be during June 23rd -27th.
