

Welcome to AP Calculus BC 2017-2018!

The idea of summer math work is not to ruin your summer or burden you with an excessive amount of work in the days leading up to the start of school. Calculus is a rigorous course. There is an expectation that each of you comes into the course with a specific skill set. The summer assignment is meant to help you maintain your current skills and strengthen any skills that may not be as strong as you would like.

Your assignment:

1. Go to <http://goo.gl/rLZUNM>
2. Scroll to “Chapter P: Calculus Prerequisites”
3. Complete each of the assignments (click “WS”) in the chapter (P.2 – P.7)
4. Notes are available next to each WS link for your reference.

Try to spread your review out over the summer. We will begin the year jumping right into our study of Calculus, so be ready to go! The better prepared you are, the easier you will keep up with the new material.

Feel free to visit my website: <https://sites.google.com/a/friscoisd.org/mrs-deany-s-website/>

Have a great summer, and see you in the fall!

-Mrs. Deany
