

**Twitter:** “Twitter is a real-time information network that connects you to the latest stories, ideas, opinions and news about what you find interesting. Simply find the accounts you find most compelling and follow the conversations.

At the heart of Twitter are small bursts of information called Tweets. Each Tweet is 140 characters long, but don’t let the small size fool you—you can discover a lot in a little space. You can see photos, videos and conversations directly in Tweets to get the whole story at a glance, and all in one place” (Twitter.com).

**Facebook:** Facebook is a social media site that allows users to connect with friends, family members, businesses, and organizations through the creation of their own Facebook page. Users are able to post pictures, videos, and information, as well as link to other websites or media and interact with other users and organizations through direct messaging or creating posts on their Facebook page wall.

**Instagram:** Instagram is an online photo sharing service that works by having users take pictures and/or videos with their mobile phones and uploading the media to their Instagram account. Users may request to follow other users, which gives them access to view the media posted to the accounts of those they follow.
