# SCHOOL NURSE

## Welcome to Scoggins Middle School Clinic

It brings me great joy to be your child's School Nurse. I have been a Registered Nurse for more than 30 yrs. I have worked as a school nurse for 13 years. I hope this information I have provided will be helpful, concerning the **Health Needs** of your child.

**Medical History:** These details can be communicated through the infonap system provided by the district online, in the summer. Feel free to contact me if there are any details you need me to be aware of before school starts next year. You can call or email me updates at anytime.

**Medication policy:** FISD does not provide any other the counter medication. You can provide Tylenol (acetaminophen), Motrin/Advil (ibuprofen), Tums, Cough Drops, &/or Benadryl (Diphenhydramin HCL), for your child. It needs to be in the original container & a signed form titled, *Parents Request for Administration*. (This can be printed from the FISD website). You will sign the same form for any daily medications that has been prescribed by your physician. The medication must have the correct prescription & name on it, if it needs to be given during the school hours. For the safety of all students at Scoggins M.S., all medications must be kept in the clinic, unless a physician has signed the form to carry own inhaler or epi-pen.

**Asthma, Food or other severe allergies, seizures, or diabetes :** It is best to use the forms found on the FISD website, each condition has specific forms that communicate the needs & doctor's orders to be followed when your child is at school. You may submit the 'Plan of Care' from your doctor if one is provided. The clinic has a nebulizer machine if your child should need a treatment while at school.

**Fever/vomit/diarrhea/lice:** These can be a topic of conversation in any given day. In FISD, any temperature 100.0 or above is considered a fever. A student needs to be fever free for 24 hours.

If your child vomits more than 2 times in 24 hr., or has frequent episodes of diarrhea, it is best to remain at home. If you treat your child for head lice, please call or email so I can help prevent a re-infestation.

I am looking forward to meeting you and your child. My aim is always prevention of disease or injury. I love teaching the students how to live a healthy life of wellness.
