

Volunteer Tracker

by app-garden

- Frisco ISD is installing a new system called “Volunteer Tracker” by App-Garden. This is a robust program is providing an automated solution for managing volunteers. It does the background check; tracks volunteer hours; makes communicating with volunteers easy. This will assist volunteer management at both the campus and the district level. This program will be installed on all campuses district wide during the 2016-2017 school year.
- How is it different from Raptor? “Volunteer Tracker” will be able to track campus volunteers; their hours worked and communicate easily with volunteers under one program.
- Will I have to do another background check this year? No, not if you have already submitted your background check for this year. If you have not completed a background check, you will complete the volunteer application in Volunteer Tracker on your home computer. In this application, you will not only have the background check completed but will also be able to sign up to volunteer for different events on each campus you have a student.
- What will be different at the campus when I come to volunteer? You will continue to sign in to Raptor each time you come to the campus. If you are volunteering at a campus, you will also sign into “Volunteer Tracker” so that the campus can track volunteer hours. If you are only coming for lunch with your student or for a teacher’s meeting, you will just sign into Raptor.
